DETAILED ACTION

Amendment received on October 31, 2005 has been acknowledged.

Subsequent to the receipt of the Amendment, the Examiner found that a Restriction is necessary based on the amended claims, which includes additional limitations and newly added claims. Further explanation of the Restriction is provided below.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 20-22 and 24-33, drawn to the specifics of extracting data and routing the document according to the extracted data, classified in class 235, subclass 375.
 - II. Claim 15-19 and 23, drawn to the specifics of determining status of the document and reporting the status, classified in class 235, subclass 376.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the extraction of data and routing of the document does not require determining

and reporting of document status. The subcombination has separate utility such as paper milling, faxing and copying of documents.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Conclusion

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
